

Mikhail Samoilov

Analyst Developer | Machine Learning

Moscow, Russia | kryiska9@gmail.com | t.me/samoilov_ma | [GitHub](#) | [LinkedIn](#)

Analyst Developer in Yandex Search Antispam and Antifraud, working across the ML product lifecycle from problem framing and experimentation to production integration. Active technical interviewer with a strong foundation in applied machine learning, data processing, and scientific computing.

Experience

Analyst Developer - Search Antispam and Antifraud Yandex Search	Feb 2025 - Present Moscow, Russia
--	--------------------------------------

- Train and integrate ML models that filter search spam, harmful content, and fraudulent activity.
- Develop ML products end-to-end, from problem framing and experimentation to production integration.
- Automated crowdsourced labeling workflows and materially reduced team labeling costs (exact reduction covered by NDA).
- Conducted 30+ technical interviews for analytics and Python roles. Author and moderator of interview tasks.

Education

M.S. in Computer Science, incoming HSE University, Moscow	2026 - 2028
---	-------------

B.S. in Computer Science Russian Biotechnological University (ROSBIOTECH), Moscow	2024 - 2026
---	-------------

- Lead a team-based bachelor's thesis structured as a startup, with formal responsibility for role allocation and coordination.

Undergraduate studies in Biophysics Moscow Institute of Physics and Technology (MIPT), Moscow	2022 - 2024
---	-------------

Technical Skills

Programming: Python, SQL, C++, Rust, R, Bash
Machine Learning and Data: PyTorch, scikit-learn, CatBoost, NumPy, Pandas, Polars, SciPy, Statsmodels
Data and Infrastructure: Spark, Kafka, Airflow, Docker, PostgreSQL, ClickHouse, Redis, Elasticsearch, Git

Selected Achievements and Open Source

- **Prize winner, final stage - All-Russian Olympiad of Schoolchildren in Chemistry**, Russia's national academic olympiad for school students.
- **Winner of an internal Yandex hackathon** focused on independent e-commerce.
- **Finalist in a biological data processing hackathon.**
- **Kaggle Notebooks Expert** with [public data-analysis work](#) and community contributions.
- **Professional development certificate in marine research.**
- **Polars contributor:** a [merged upstream contribution](#) fixing serialization of byte-backed LazyFrames in the Rust core and adding Python regression tests.

Research

- Prepared a 2026 conference thesis on the effect of Prioritized Experience Replay parameter α on a self-play DQN agent in the game Ugolki. The [manuscript is awaiting publication](#).
- Contributed to seven oceanology publications through data cleaning, preprocessing, quality control, and preparation of observational datasets for analysis.
